

**Emergency Response
Preparedness (ERP) planning
Global Nutrition Cluster**

February 23, 2021

Overview of the Session

1. Introduction and webinar objectives
2. Overview of emergency preparedness approaches and systems and an introduction to the ERP Approach and **Q&A**
3. Nutrition Coordination Mechanisms and the ERP Approach
 - Overview of the 2021 GNC ERP exercise
 - How to conduct ERP planning at a country-level
 - Conducting a risk analysis and monitoring
 - Step by step contingency planning
 - Identifying preparedness actions and monitoring
4. Introduction to the GNC ERP online tool and dashboard
5. Next steps
6. Q&A

Objectives of the Session

By the end of this session, participants will be briefed on the:

- Different **approaches to emergency preparedness**, with a focus on the Emergency Response Preparedness (ERP) Approach
- **GNC 2021 ERP exercise** and timeline
- **Key outputs** of the 2021 ERP exercise at a global- and country- level
- **Next steps** required by Coordination teams at a country-level (with support from GNC)

Overview of Emergency Preparedness and an Introduction to the IASC ERP Approach

Emergency Preparedness Approaches and Systems

Emergency preparedness can be conducted at various levels and involves a respective array of actors.

POLL: In your context, what emergency preparedness plans are in place?

Option 1. None

Option 2. Inter-Cluster/Sector ERP

Option 3. UNICEF preparedness plans

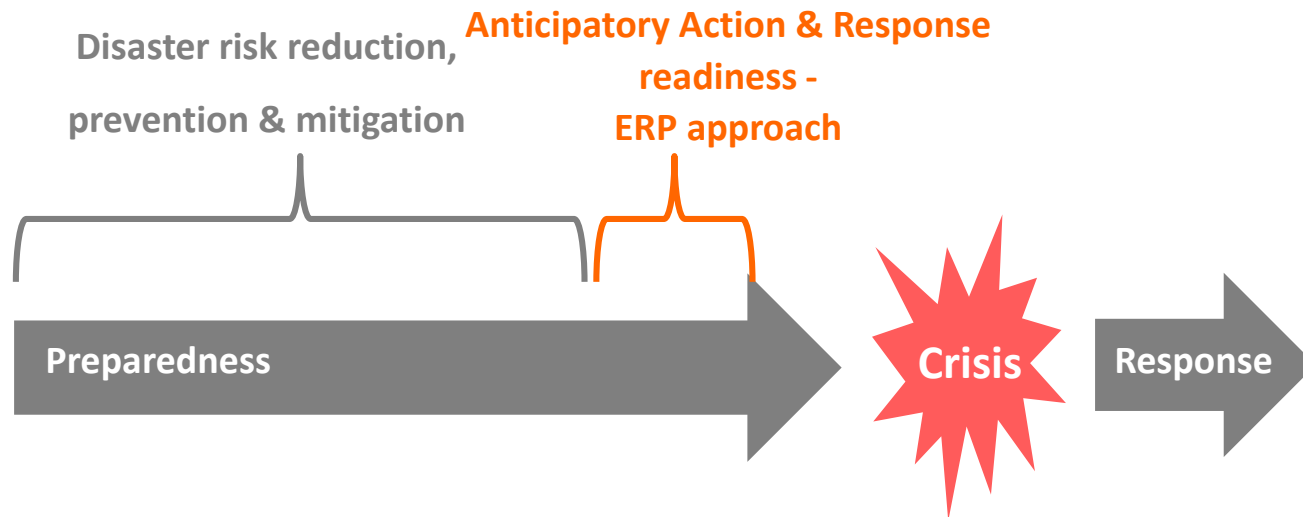

Option 4. Government-led preparedness plans

Option 5: Nutrition Cluster/Sector preparedness plans

Option 5. Other

What is the ERP approach?

The ERP approach has three inter-related levels of action:

Elements of the IASC ERP Approach

ERP is a continuous process, divided into three key elements.

Risk analysis and monitoring

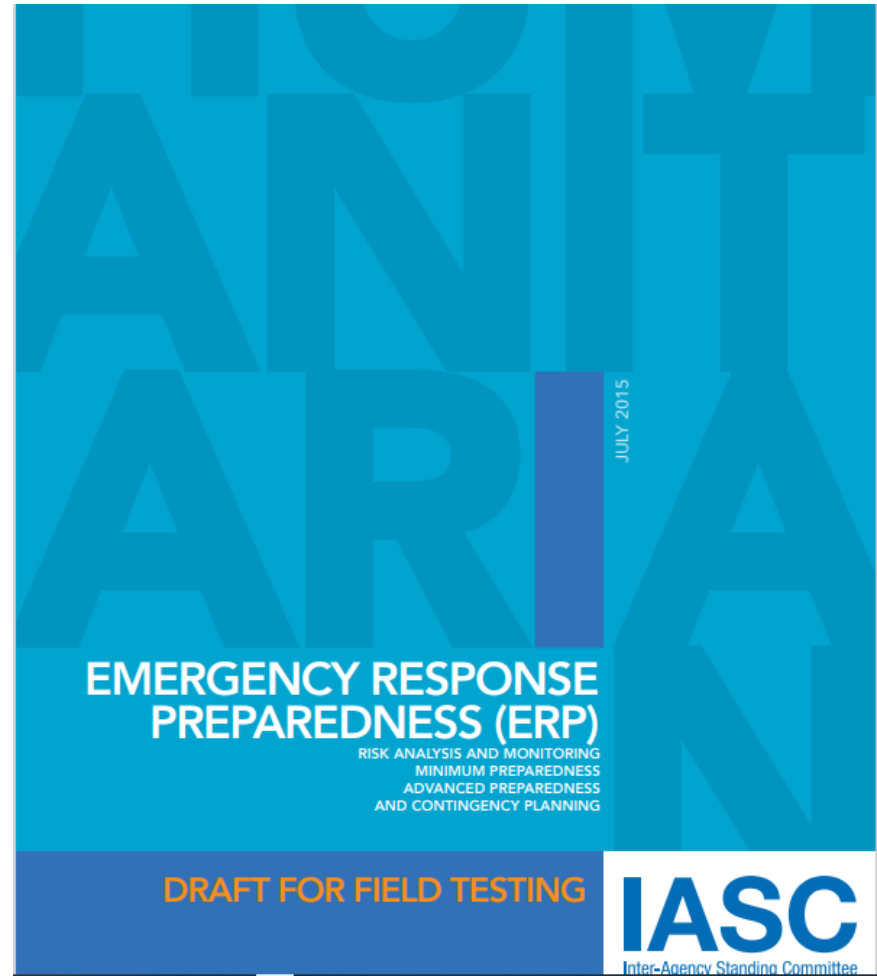

Contingency Planning - step-by-step process for anticipatory action and readiness

Minimum and Advanced Preparedness Actions

ERP Approach guidance

- Updated guidance developed in 2020 and will be available shortly.

Review: True or False

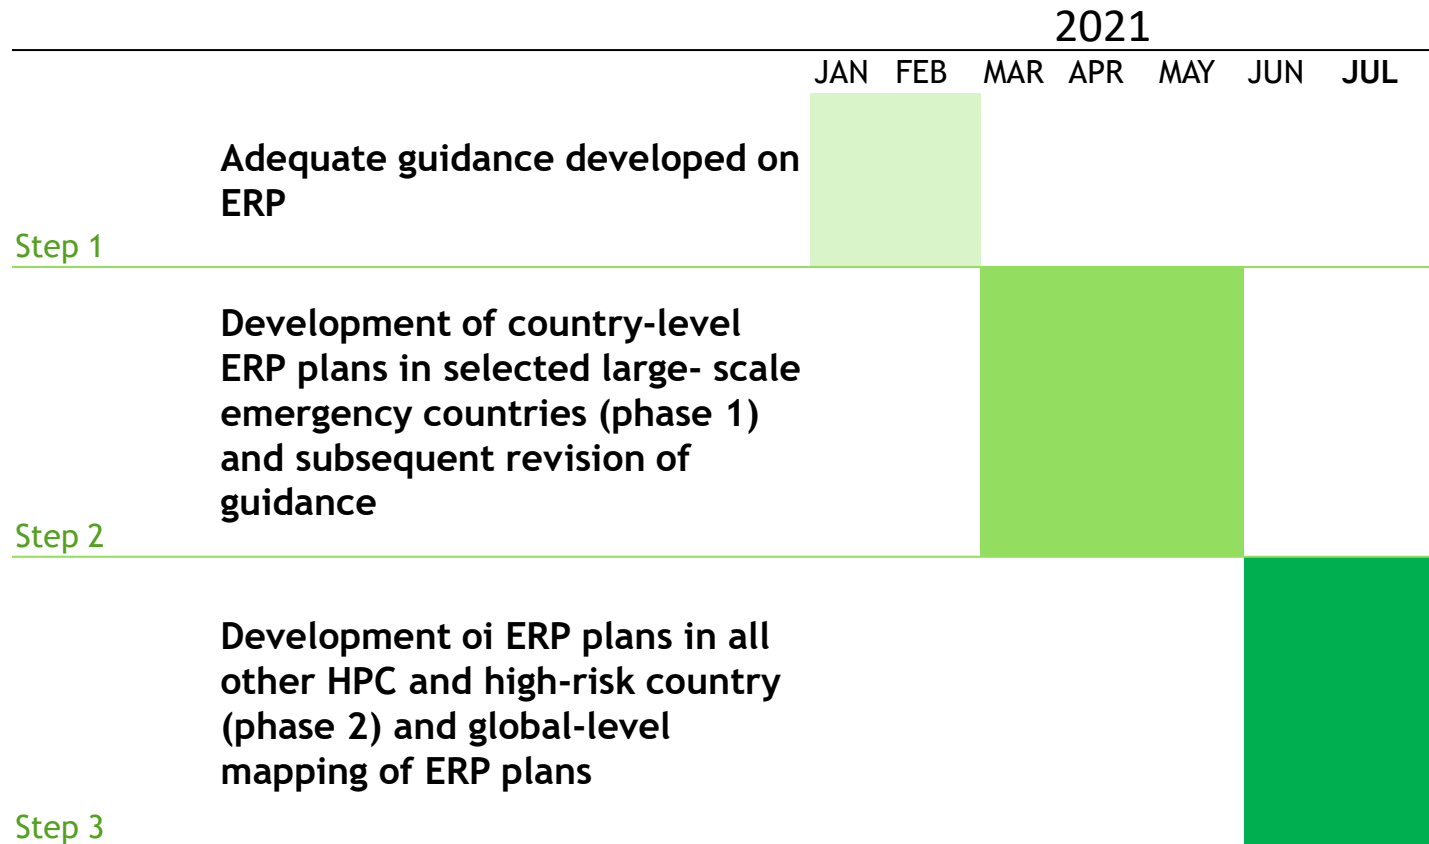

Poll: Indicate which statements are true

- Preparedness is part of the Humanitarian Programming Cycle.
- The ERP Approach aims to improve the speed and efficiency of the first 4-6 weeks of an emergency response
- The ERP Approach is applicable to UNICEF-led Clusters only

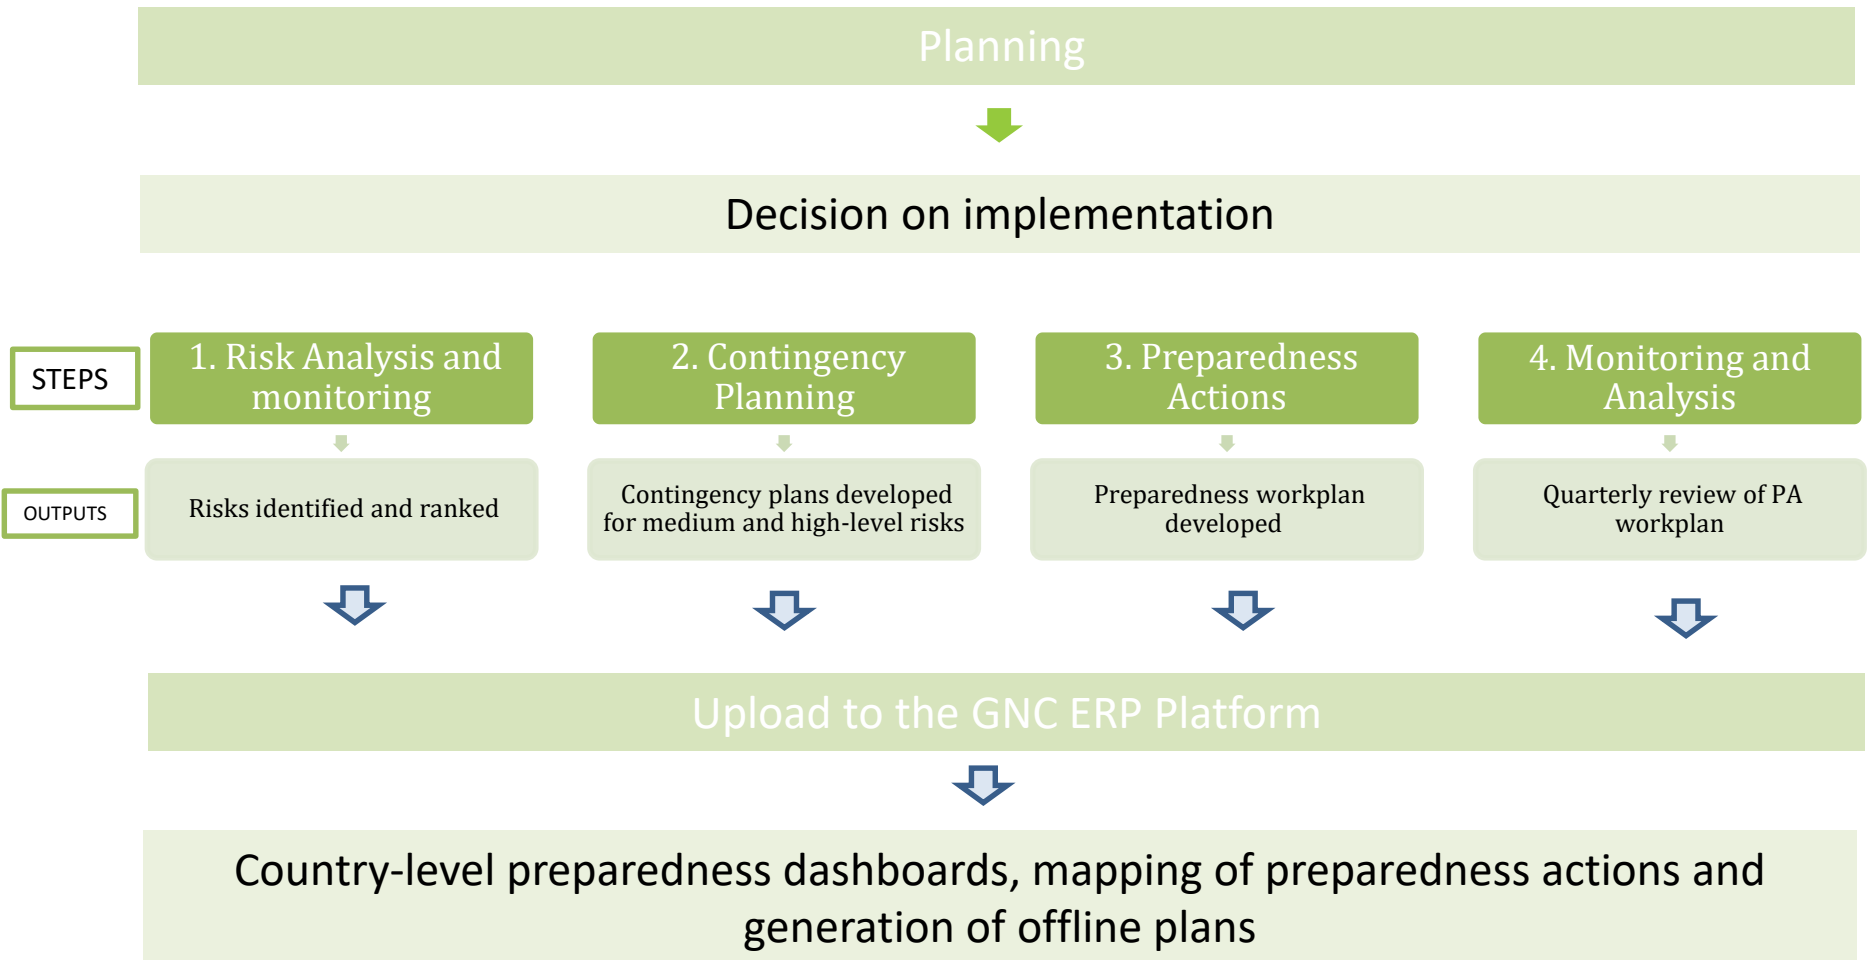

Questions?

Nutrition Coordination Mechanisms and the ERP Approach

Nutrition Cluster/Sector-level ERP Process Overview

The ERP Approach process at a country-level

Step 1. Risk analysis and monitoring

Actions

- Discuss Step 1 with the GNC, SAG and Partners
- Identify whether Step has been completed by OCHA or UNICEF
- Conduct workshop to:
 - Identify hazards
 - Rank risks
- Upload outputs to the online platform

Diagram: Overview of the risk analysis process

Step 1. Risk analysis and monitoring

Step 1.1. Hazard Identification

- Six hazard categories
 - Natural hazards
 - Armed conflict and civil unrest
 - Epidemics and pandemics
 - Drastic changes in the socio-economic environment (such as surge in prices of food)
 - Serious violations of human rights
 - Environmental hazards

Step 1: Risk analysis and monitoring

Step 1.2. Risk Ranking

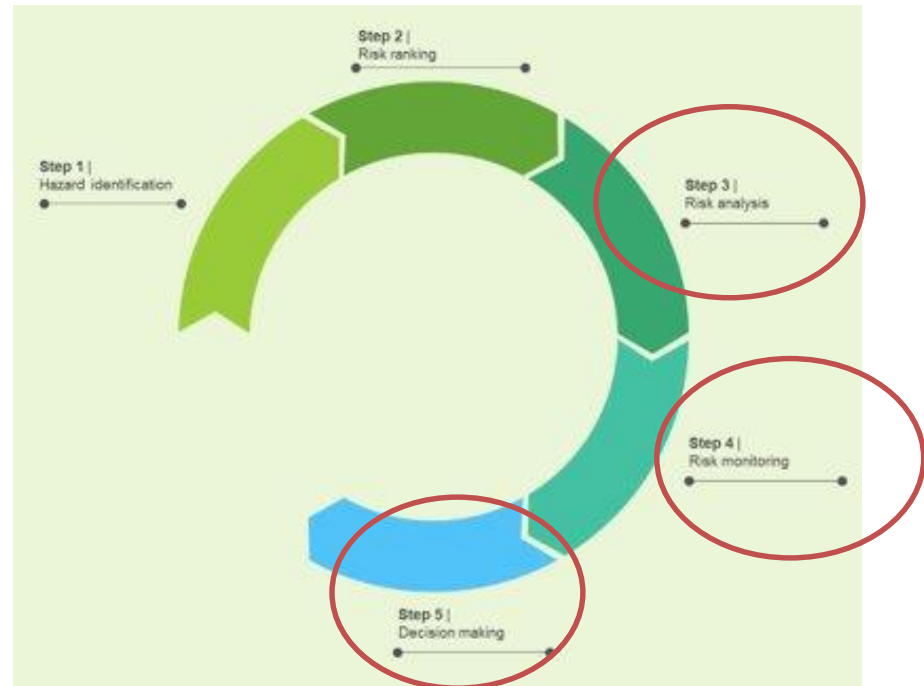

- For each identified hazard, rank twice on scale of 1-5 for likelihood and impact
- Upload ranking to the GNC ERP online tool, to identify rating gravity (Risk ranking = impact x likelihood)
- ERP platform will plot results on a risk graph.

Step 1: Risk analysis and monitoring

Steps 1.3-1.5

- Insert 200-word risk analysis into online tool
- Monitor risks and update periodically
- For risks identified as medium to high – decide whether contingency planning is needed.

Step 1: Risk analysis and monitoring

Step 1.1-1.4: Online form

» Hazard Identification and ranking

A. Hazard		Hazard category	
1. Natural hazards (hydro-meteorological and geophysical)		Droughts	
C. Perceived Impact (1-5; 5=high)	D. Perceived Likelihood (1-5; 5 high)	E. Score (Impact x Likelihood=Risk)	F. Risk
1 2 3 4 5	1 2 3 4 5	12	Medium Risk
Risk Analysis Description			

+

Risk analysis and monitoring dashboard

Risk analysis

Hazard identification and ranking

Step 2. Contingency planning

Action:

- Conduct workshop to develop contingency plans for each medium to high risk.
- During workshop, discuss the following:
 - Review identified hazards and risk rankings, and agree on risks to include under the contingency plan
 - Scenario setting for each risk:
 - People in Need (PIN)
 - Key Immediate Needs (KIN)
 - Response and operational capacity
 - Discuss what protocols, guidelines, are in place
 - Discuss cluster and partner capacity
 - Discuss potential prepositioning of supplies
 - Capacity gaps and constraints
 - Discuss capacity gaps such as anticipated pipeline breaks or lack of protocols etc.
 - Response strategy
 - Operational delivery
 - Operational support arrangements
 - Priority preparedness actions
 - Identify priority PAs from GNC ERP guidance
 - Funding requirements
 - Discuss funding gaps for each potential scenario

Step 2. Contingency planning

GNC Emergency Preparedness Plan v2

▼ 3. Contingency Plan

▼ » 3.1 Humanitarian Consequences

Briefly outline what the immediate needs of the population are likely to be based on risk analysis and highlight those factors which exacerbate vulnerabilities;

▼ » » a. Scenario (Humanitarian Consequences)

Hazard * 4. Drastic changes in the socio-economic environ... ▼		Geographic area *		Affected population (CU5 Boys) <i>Number</i> ▼	Affected population (CU5 Girls) <i>Number</i> ▼	Affected population (PLW) <i>Number</i> ▼
PIN for nutrition (CU5 Boys) <i>Number</i> 0 ▼		PIN for nutrition (CU5 Girls) <i>Number</i> ▼		PIN for nutrition (PLW) <i>Number</i> ▼

3.2. Response & operational capacity

Capacity	List of Available capacity values
Supplies	
Supplies needed clear, prepositioned, and are pathways to purchase those	Anthropometric equipment, BP5, F100, F75, IFAS, MNP, Plumpydoz, RUSF, RUTF, Vit A
Partners	
Technical capacity of partners to implement programs	Assessments, BSFP, Deworming, IFAS, IPT, IYCF-E, MAM, MNP, OPT, SAM, Vit A
Coverage or implementation	Specify the partners
Guidelines & Tools	
National guidelines, protocols, training materials and tools up to date and available in the	Assessments, BSFP, Deworming, IFAS, IPT, IYCF-E, MAM, MNP, OPT, SAM, Vit A
A pool of trained trainers (TnT)	IYCF-E, Micronutrient, Prevention of

3.3 Gaps and constraints

Gaps	Constraints
Briefly outline the capacity gaps in the provision of humanitarian assistance. Try to address the gaps in the	Describe major obstacles to providing humanitarian assistance (security, access constraints, administrative obstacles, logistics)

3.4 Response strategy

Objective	Day 1-7	Week 1
products, appropriate infant and young child feeding practices in emergency and micronutrient interventions.		
Number of boys and girls 6-59 months with	Yes	

Microsoft Power BI

Step 3. Preparedness Actions

Actions

In a workshop setting:

- Review GNC-specific PAs
- Develop a PA workplan
- Upload workplan to GNC online tool

Step 3. Preparedness Actions

Example of Preparedness Actions Workplan

COORDINATION								
	Minimum Preparedness Actions	Status			Due date/ Timeframe	Lead	Actions	GNC Guidance
		Done	Deadline set	To be initiated				
Coordination	Nutrition in emergency coordination mechanism established							5.2.1
	Technical Working Group and Strategic Advisory Group created							5.2.2
Guidance	Terms of reference for Nutrition Cluster staff are available							5.2.3
	TORs for the Nutrition Cluster, TWGs and SAG developed and endorsed by members							5.2.4
	Contact list of nutrition Cluster/Sector partners is available and updated							5.2.5
	The Nutrition Cluster participate and contribute to inter-sector coordination							5.2.6
	Cluster members are familiar with humanitarian principles, cluster approach and accountability to affected populations							5.2.7
	The Nutrition Cluster contributes to cross-sectoral objectives							5.2.8

Step 4. Monitoring and Analysis

Action:

- On a periodic-basis,
 - monitor PAs using the workplan and send updated version to GNC
 - Review risks and recalculate gravity, and update online tool accordingly.

Steps 1-4. Available Guidance

NOTE: IASC 2020 guidance will soon be published.

Demonstration on the GNC ERP online Tool

- Demonstration on the GNC ERP online tool by Magnat

Next Steps

Next Steps

Step 2 of global plan.

- Bilateral calls with each country included in Phase 1 of the roll-out
- Plan and conduct country coordination level workshop
- Upload ERP content to online GNC ERP platform
- GNC review and finalise online inputs

Available Support

Remote support with the ERP Approach:

- One-on-one calls with each country
- Review of draft documents
- Support with uploading to the online tools

English and Spanish Speaking Countries

Briony Stevens
bstevens@unicef.org

French Speaking Countries

Caroline Abla and Angeline Grant
cabla@unicef.org and agrants@unicef.org

Reference tools and guidance will be shared by the GNC
